

SupplyWEB®

Enabling the Virtual Enterprise

Benefit from a Lean Supply Chain

SupplyWEB® is an advanced, web-enabled Supply Chain Management and Execution solution from Infor. It is designed to reduce supply chain costs, reduce inventory and increase operational efficiencies. It delivers significant ROI by increasing supplier visibility, enabling inter-enterprise communication, and providing a high level of systems integration. SupplyWEB presents one face to your suppliers — it combines the information from multiple versions of disparate ERP systems into a single, universal view for your suppliers and internal users.

SupplyWEB includes traditional EDI communication and web-based methods, with a mix of capabilities ranging from fully integrated machine-to-machine EDI transactions to automated fax. With SupplyWEB, you can achieve 100% electronic communications with all your suppliers, even if some of them do not have EDI capability and eliminate the need for a VAN.

Just reaching the supply chain isn't enough — taking advantage of the procurement methodology that best fits each commodity is a must. SupplyWEB gives you total flexibility to control each commodity based on how it is utilized and consumed, including Discrete purchase orders, KANBAN, standard forecast, shipping schedules or supplier managed inventory. To complete the circle, tying these methodologies into Supplier Performance and Supplier Self-Service is critical. SupplyWEB allows your suppliers to respond quickly to alerts and exceptions. It also allows you to rate the performance of each supplier and focus on resolving and preventing the exceptions.

Strong ROI

Supply Chain Management

- Event Management
- Alerts
- Shipping
- Receiving
- ERP Integration

Supply Procurement

- Discrete Purchase Orders
- Supplier Managed Inventory Releases
- Advance Shipment Notices
- Electronic Kanban
- Premium Freight

Supplier Performance

- Supplier Ratings
- Supplier Action Plan
- Corrective Action
- Root Cause
- Defective Material Notices
- Delivery Issues

Infor set the bar for SCM solutions when we introduced SupplyWEB in 1997, and we continue to raise the bar with increased functionality not found in any other solution. That's why we have over 30,000 licensed suppliers today.

SupplyWEB: Cost Reduction/ROI

Infor Global Solutions takes pride in the 20 years of experience we have in the discrete manufacturing industry. Using our deep base of industry knowledge and proven communications and planning applications, we help suppliers and manufacturers achieve their business goals.

We are passionately focused on developing comprehensive solutions that meet the unique challenges of manufacturers on a global scale. Our product suites are comprehensive, open and modular, giving you the optimal choices to meet today's challenges and leverage tomorrow's opportunities.

- Lower your inventories and carrying costs by gaining full visibility of all inventory, including in-transit
- Use Discrete purchase orders with your suppliers
- Use alternative procurement methods, such as Supplier Managed Inventory (SMI) or kanban, to manage high-volume/high-cost inventories, saving labor dollars and avoiding accuracy issues
- Exception management tools can free up 80% of your staff's workload, allowing them to spend that time on further continuous improvement processes and increasing your profitability
- Cut labor time and human error costs by eliminating the need for manual intervention in planning and sending of supplier schedules
- Eliminate manual tasks of calculating and entering supplier performance information into your system as well as the labor time involved in calculation and re-entry of supplier responses
- More information with less effort to simplify your procedures: supplier communications, accounts payable, receiving, etc.

The Most Complete Procurement & Performance System Available

- Multiple Procurement Methods: including Discrete Purchase Orders, Supplier Managed Inventory (SMI), Standard Releases and KANBAN
- Supplier Performance System: Automate the performance rating of your suppliers, with DMN (Defective Materials Notices), DPRs (Delivery Performance Reviews) and more
- Cost Savings: Can positively impact the price you pay for components by allowing your suppliers to be more cost effective
- Internet/e-Business Advantages: Allows a paperless system of communication with all your suppliers to meet the electronic communication requirements of the customer
- Profitability & Process Improvement: Cut waste out of supply chain management processes and significantly impact your bottom line
- Easy Implementation: Ask how we enabled a customer to connect 300 suppliers in just two weeks!
- A Plan for Every Supplier
- A Plan for Every Part
- Dramatic Operational Improvements
